Foundations of Nursing Secrets Study Guide Elsevier

Health Sciences
The fully updated second edition of Foundations of Nursing gives you all the information you need to successfully complete your nursing curriculum. This single volume includes comprehensive, fundamental content in basic nursing, adult health nursing, and maternal and pediatric nursing. Introductory content covers such

topics as the health care system, communication, nursing processes, and client teaching. Current topics such as HIPAA, West Nile Virus, SARS, and bioterrorism are also discussed. The adult health nursing section is written following the Nursing Process format. The clinical chapters have been revised to include Nursing Management sections for each disorder, emphasizing the nurse's role in providing competent client care. Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) have been identified in each Nursing Care Plan. A Case Study included in each chapter uses critical thinking questions to

assist the user through the nursing process and to develop a customized plan of care for the client in the scenario. The maternal and pediatric section covers topics such as prenatal care, complications of pregnancy, birth, postpartum care, and newborn care.

Childrearing is covered from birth through 18 years of age.
