The author explains the relationship between the reflex points on the feet and the internal organs,

and shows how reflexology can be used in the diagnosis and treatment of illness.

Septimus Felton Penguin UK

“A fiercely imagined tale of love and loss, a story that manages to transform tragedy into comic redemption, sorrow into heroic survival.”

—New York Times “[A] beguiling family saga....A captivating jigsaw puzzle of longing and loss whose pieces form an unforgettable image of contemporary Native American life.” —People A New York Times bestselling author, a Pulitzer Prize finalist, and winner of the National

Book Critics Circle Award, Louise Erdrich is an acclaimed chronicler of life and love, mystery and magic within the Native American community. A hauntingly beautiful story of a mysterious woman who enters the lives of two families and changes them forever, Erdrich's classic novel, *The Antelope Wife*, has enthralled readers for more than a decade with its powerful themes of fate and ancestry, tragedy and salvation. Now the acclaimed author of *Shadow Tag* and *The*

Plague of Doves has radically revised this already masterful work, adding a new richness to the characters and story while bringing its major themes into sharper focus, as it ingeniously illuminates the effect of history on families and cultures, Ojibwe and white.

[The oration of Demosthenes On the crown](#) Routledge
Labour Law in Denmark gives the reader a broad understanding of Danish Labour Law covering all important aspects. The

book deals with the sources of labour law, individual employment relationship, collective bargaining, remuneration, working conditions settlement. It provides advocates and administrators, management and labour, and especially students, with an overview of all aspects of Danish labour law, and, to some extent, of its social, economic and political context.
[Hawk O'Toole's Hostage](#)
 Cambridge University Press
Vacationing in the West,

Miranda Price, a young divorcee, and her son are taken hostage by a Native American named Hawk O'Toole as part of a desperate gamble to help his people, and is forced to face up to a shocking revelation. Reprint.

Making a Good Brain

Great Orient Paperbacks
The author of *Change Your Brain, Change Your Life* explains how to achieve and maintain optimum mental performance, drawing on cutting-edge neuroscience research to explain how to protect the brain from

injury and toxic substances, nourish it with vitamins, give it a mental workout, alleviate stress, and more. Reprint. 30,000 first printing.

Reflex Zone Therapy of the Feet

State of the World's Children
The collection of writings known as the *Corpus Hippocraticum* played a decisive role in medical education for more than twenty four centuries. This is the first full-length volume on medical education in Graeco-Roman antiquity since Kudlien's seminal article

from 1970. The articles in this volume were originally presented as papers at the XIIth International Colloquium Hippocraticum in Leiden in 2005.

Prehistoric Times to 500 C.E. Penguin

Incisive, controversial and startlingly funny, *The Rules of Attraction* examines a group of affluent students at a small, self-consciously bohemian, liberal-arts college on America's East Coast. Lauren, who changes the man in her bed even more often than

she changes course, is dating Victor but sleeping with Sean. Sean - cool, ambivalent and deeply cynical - might be in love with Lauren, but he's not going to let that stop him from bedding Paul. Paul, as shrewd as he is passionate, is Lauren's ex-lover and the final point in this curious triangle. This is a breathtaking tale of sex, expectation, desire and frustration.

Picador

Nathaniel Hawthorne was one of the greatest

American writers of the nineteenth century. Hawthorne's writing is unique as it often featured moral struggles among the Puritans in and around New England. Hawthorne's books became some of the most famous works of dark romanticism and his novel *The Scarlet Letter* is considered a classic in American literature. *Septimus Felton*, published in 1872, is an unfinished novel that centers around the title character's attempt to create an elixir of life.

Advances Elsevier Health Sciences

As the debate about whether the internet is safe for children rages, *The State of the World's Children 2017: Children in a Digital World* discusses how digital access can be a game changer for children or yet another

dividing line. The report represents the first comprehensive look from UNICEF at the different ways digital technology is affecting children, identifying dangers as well as opportunities. It makes a clear call to governments, the digital technology sector and telecom industries to level the digital playing field for children by creating policies, practices and products that can help children harness digital opportunities and protect them from harm.

Ziva Hrana Harper Collins

Garlic is nature's wonder drug. Its medicinal value has been understood by herbalists for at least 2000 years. Garlic contains hundreds of minerals and nutrients. It is an antibiotic against colds and infections; an anti-inflammatory against

arthritis; an immune stimulant against cancer; an aid to remove cholesterol, toxic metals, and radiation; a relaxant to relieve stress and hypertension; and a nutrient against anemia. Whether it's crushed or finely chopped and eaten raw or added to cooked food just before serving or taken as an odorless supplement is down to individual preference. What is clear is that garlic offers tremendous health benefits. The Healing Power of Garlic discusses the historical uses of

garlic, current research findings, and how to prepare and apply it for various ailments. Garlic has powerful antibiotic, antiviral and antifungal characteristics. Garlic is as effective as many modern antibiotics, without the dangerous side effects.

Over vast expanses of time, fire and humanity have interacted to expand the domain of each, transforming the earth and what it means to be human. In this concise yet wide-ranging book, Stephen J. Pyne—named by Science magazine as “the world’s leading authority on the history of fire”—explores the surprising dynamics of fire before humans, fire and human origins, aboriginal economies of hunting and foraging, agricultural and pastoral uses of fire, fire ceremonies, fire as an

idea and a technology, and industrial fire. In this revised and expanded edition, Pyne looks to the future of fire as a constant, defining presence on Earth. A new chapter explores the importance of fire in the twenty-first century, with special attention to its role in the Anthropocene, or what he posits might equally be called the Pyrocene.

The Complete Tolkien Companion CreateSpace
Waste biomass includes agricultural residues, livestock wastes,

municipal wastes and industrial organic wastes. It should be utilised or otherwise, it will cause the pollution of water, soil and even the atmosphere. Gas biofuels have attracted growing attention as a renewable and clean energy carrier. Gas biofuels include biogas, biohydrogen and its mixture i.e. biohythane, which can be produced via anaerobic fermentation or other processes from waste biomass. This book focuses on the principles of gas biofuels in terms of

types of biofuels, biomass species, and reactor configuration and production pathway. A number of books focus on the production of biogas or biohydrogen alone. In comparison, this book emphasizes the interactions and common knowledge of both. In addition, the potential of new technologies, such as microbial electrochemical technologies, and two-stage fermentation on gas biofuel production are highlighted and specifically discussed based on the authors

research basis. This book provides a state-of-the-art technological insight into the production of gas biofuels from waste biomass. Specifically, this book consists of three parts. In Part I, the principles for gas biofuels production from waste biomass, including biogas production (Chapter 1) and biohydrogen production (Chapter 2). Part II focuses on the technical advances on gas biofuels production. Pre-treatment of biomass was firstly introduced in Chapter 3, whereas the

advances of biogas production from high-solid wastes were discussed in Chapter 4 and Chapter 5. In comparison, biohydrogen production is reviewed not only through dark fermentation (Chapter 6) but also emerging microbial electrochemical technology (Chapter 7). The co-production of biohydrogen and biomethane is reviewed in Chapter 8. In addition to the utilisation of carbon and hydrogen stored in biomass, nutrients recycling through algae

technology is discussed in Chapter 9. Part III discusses the scale-up and industrialization of biofuels. An industrial case is introduced to analyse the bottlenecks and perspectives for development of gas biofuels.

BRILL

This is the largest, most comprehensive, and by

far the most up-to-date dictionary providing English equivalents of the SerboCroatian lexicon, including about 60,000 SerboCroatian headwords and 100,000 phrases, idioms, and collocations. The vocabulary represents the present-day speech of educated Yugoslavs and of the daily press, and includes the complex political and economic terminology used in contemporary Yugoslavia. The new edition includes a large number of current usages as well as essential

computer terms. This dictionary accounts for the differences between the Eastern and Western varieties of SerboCroatian as well as between American and British English. The leading

dictionary of its kind in Yugoslavia, this dictionary is a must for every reference library. A Novel St. Martin's Griffin "Updated and with a new introduction"--Cover.

Labour Law in Denmark
Serbian Classics Press
Presents a history of medicine and the treatment of disease and injuries from prehistoric times up to the end of the Roman Empire.
